

**New Hampshire Department of Transportation
Bureau of Materials & Research**

Qualified Products List – Qualification Criteria

Section 534 – Water Repellent

A. ITEM 534.1 - LINSEED OIL (Anti-spalling Compound)

- Specification

Boiled linseed oil mixture shall conform to AASHTO M 233 and shall be composed of 50 percent double boiled linseed oil and 50 percent petroleum spirits, by volume.

- Required Submissions

The manufacturer shall submit test results from an independent lab, demonstrating that all specification requirements are met. The qualifications of the independent lab must also be submitted for review. Alternatively, test results from another State transportation agency or the AASHTO National Transportation Product Evaluation Program (NTPEP) may be submitted.

- Qualification Criteria

The Department will review submitted test results to assure conformance with the specifications. The credentials of the testing lab will be reviewed to assure they are qualified to perform the required tests.

Approved by: *Alan D. Rawson*
Bureau Administrator

The Department continues to evaluate its qualification criteria as well as products that have been qualified against them, and reserves the right to revise the criteria and/or withdraw product qualification at any time for any reason without notice.
